

Molecular Cell Biology Journal Club

Spring 2017

GMS 6690, Section 1350 (1 credit hour)

Course Director:

Eric Vitriol

evitriol@ufl.edu

Basic Science Building, B1-007

273-2914

Class details:

Day: Tuesday

Time: 1:00-2:00PM

Room: R2-265

Begin: January 10

End: April 18

Grading:

Presentation: 50%

Participation in Discussion: 50%

Presentation requirements:

- Topic for the semester: #mcbtbt: Cell's 40th Anniversary Annotated Classics
- One presenter per class
- Presentations should be 35-40 minutes, allowing for 20-25 minutes of discussion
- Papers to be presented must be approved by Course Director beforehand
- Presentations must include background on **BOTH** the science and the techniques that are essential to understanding the paper. Please include insight and background found in the annotations.

Other:

- Students must participate in the discussion in some way in **every** class. Ask a question, have the presenter clarify a point, share your thoughts or experiences, be critical or supportive of the data...but do speak up. This is essential for your grade but also makes the class dynamic and interesting. Not participating in the discussion is the same as not coming to class at all.
- Excused absences must be cleared with the Course Director beforehand
- If you cannot present on the date assigned, find someone to switch with and then contact the Course Director
